| Aluminium supplier accreditation | To ISO 14001 |
| Glass supplier accreditation | To ISO 14001 |
| Glazing Vision accreditation | To ISO 14001 |

Partial Provision

Embodied Carbon (Product Components) – at the current time we can provide details of components comprising approximately 70% of rooflight construction (covering aluminium and glass). The percentage of reporting will vary according to the product purchased or designed, and reporting ability may increase over time. All data is provided voluntarily and is produced using the UK Government published DEFRA Greenhouse Gas conversion factors and is unverified.

We cannot provide

Unfortunately, at the present time, Glazing Vision Ltd are unable to provide the following items:

- VOC for adhesives and sealants – tested by manufacturers but results not accredited according to some BREEAM approved listings
- Embodied Carbon Emissions for product lifecycle including all Scope 3 GHG emissions
- Environmental Product Declarations (EPD)

Please note that Glazing Vision Ltd collects and monitors greenhouse gas emissions for Scope 1 and 2 emissions for internal improvement purposes only and is not subject to the mandatory reporting requirements of the Streamlined Energy & Carbon Reporting Framework (SECR) or the Energy Saving Opportunities Scheme Regulations (ESOS).

Signed:
